Types of Vessel Sharing Agreements

Vessel sharing agreements can vary significantly depending on their scope, structure, and contractual arrangements. The primary types include:

1. Slot Charter Agreements

A slot charter involves one carrier (the charterer) purchasing space (or slots) on another carrier's vessel without owning or operating the vessel themselves. This arrangement allows the charterer to offer services on specific routes without deploying their own ships.

Features:

- Contract for a specified number of container slots
- Typically used for short-term or route-specific needs

Features:

- Leases a portion or the entire vessel's capacity
- Usually involves a longer contractual period
- Allows the charterer to operate under their own branding and schedule

3. Vessel Sharing Agreements (VSA) or Pool Arrangements

This is a more integrated form of cooperation where carriers agree to operate their vessels jointly on certain routes, sharing revenues, costs, and operational responsibilities.

Features:

- Common operational platform for vessels
- Shared revenues and expenses based on predefined formulas
- Often used in slot or space sharing arrangements with mutual benefits
- Facilitates increased route coverage and service frequency

4. Consortium Agreements

A consortium is a group of carriers that collaborate on specific routes or services, pooling their vessels and resources to provide comprehensive coverage.

Features:

- Joint investment in vessels or terminals
- Shared operational and marketing responsibilities
- Typically governed by detailed agreements outlining each member's obligations
