Sample Questions and Answers from GPB Physics Note Taking Guide 1103

Question 1: What is Newton's Second Law?

Answer: Newton's Second Law states that the acceleration of an object is directly proportional to the net force acting upon it and inversely proportional to its mass. Mathematically, it is expressed as $F = ma$, where:

- F = net force (in newtons)
- m = mass (in kilograms)
- a = acceleration (in meters per second squared)

Question 2: How do you calculate kinetic energy?

Answer: Kinetic energy (KE) is the energy an object possesses due to its motion. The formula is:

$$[KE = \frac{1}{2} m v^2]$$

where:

- m = mass of the object
- v = velocity of the object

Question 3: Describe the principle of conservation of energy.

Answer: The conservation of energy states that energy cannot be created or destroyed; it can only be transformed from one form to another. In a closed system, the total energy remains constant. For example, potential energy can convert to kinetic energy during free fall, but the total energy stays conserved.
